

The uploading of major data of archival city survey maps is in progress. This uploading is in addition to archival data regarding municipality records of Karachi dating to mid 1800s that has already been uploaded. The data has become available as a result of repairs and conservation carried out by Heritage Foundation, the digitization of which was supported by the German Government. The maps included in this report are of 'Suddar Bazaar Quarter' dated 1874.

HF's electronic data site will be launched as part of its website in October 2014 on the occasion of an extensive program being organized by German Consulate General on the occasion of celebrations of the German National Day.
