

TOMB OF JAN BABA

Several folios carrying detailed information were also prepared for the tomb of Jan Baba. These are considered essential before undertaking any conservation as they provide base line information and analysis of the soil conditions as well as condition of the structure. A Consultative Committee (CC) meeting is still to be held; however, being a stone structure, work of cleaning and basic repairs has been started. Further work will be undertaken once the CC meeting has been held.

The following are the members of the Consultative Committee:

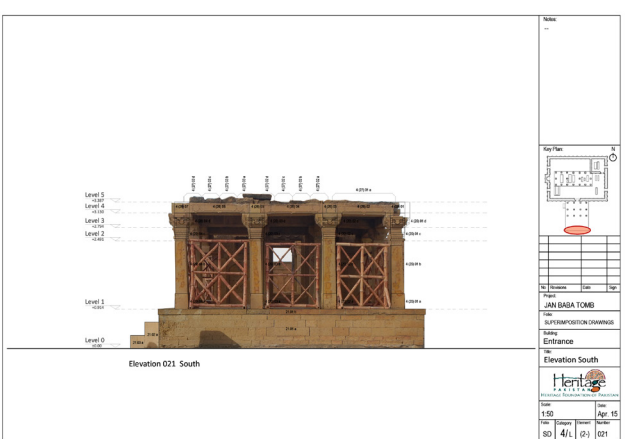

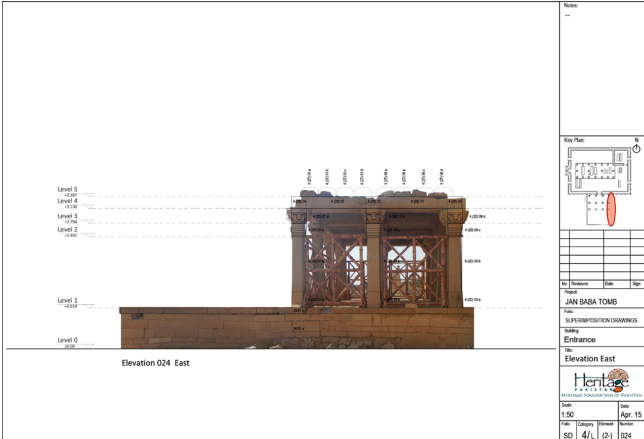

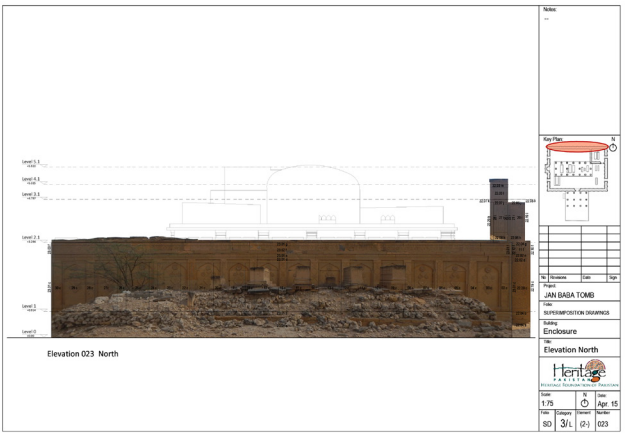

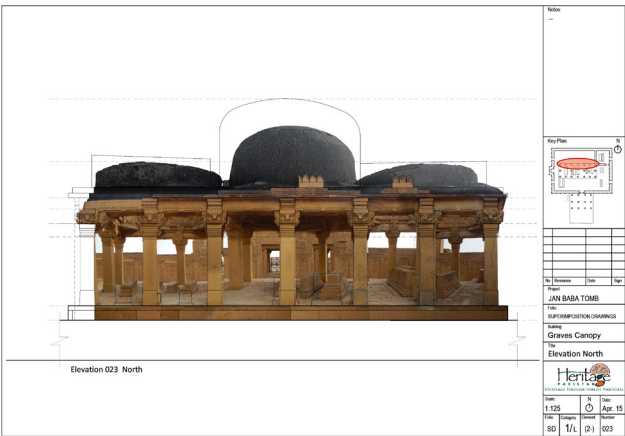

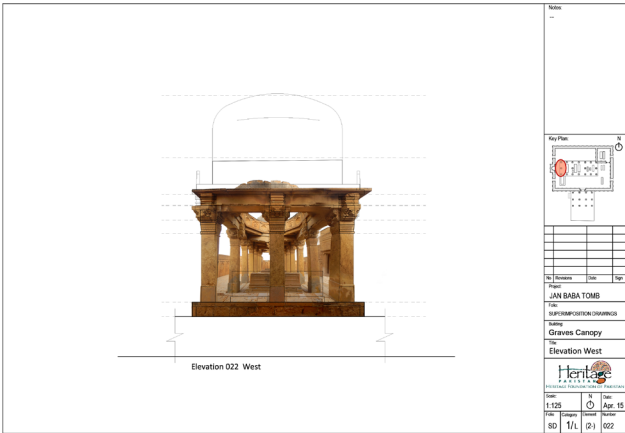

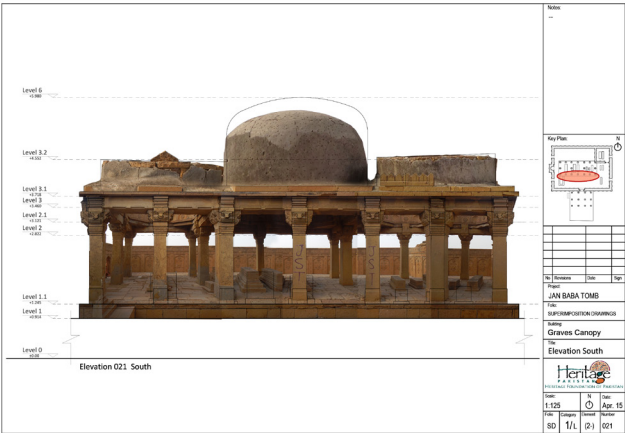

1.

Ar. Yasmeen Lari
2.

Mr. Saleem ul Haq
3.

Mr. Qasim Ali Qasim
4.

Mr. Amin Tariq
